

VACCINES SAVE MILLIONS OF LIVES EVERY YEAR

Routine vaccinations are at record lows due to the COVID-19 pandemic, leaving millions of Americans at risk of long-term health impacts from diseases previously eradicated.

95%

decrease in two flu vaccines

84%

decrease in total scripts of the shingles vaccine

27%

of the public is hesitant to get the COVID-19 vaccine (KFF)

VACCINE CONFIDENT

✓ **SAFE**

✓ **BACKED BY SCIENCE**

Vaccines are developed from evidence-based research and are a key way to improve health on a global scale. Not taking advantage of proven vaccines turns back the clock on prevention to the 20th century.

Vaccinations will prevent

419m illnesses + **26.8m** hospitalizations + **936,000** deaths

in children born from 1994-2018 (NFID)

Early childhood vaccines can prevent at least

13 diseases (CDC)

Recommended clinical preventive care could save more than

100,000 lives

each year (CDC)

50,000+ adult deaths

are attributable to vaccine-preventable diseases each year (NFID)
